

SELF-TAPPING INSERTS - SERIES IPHI

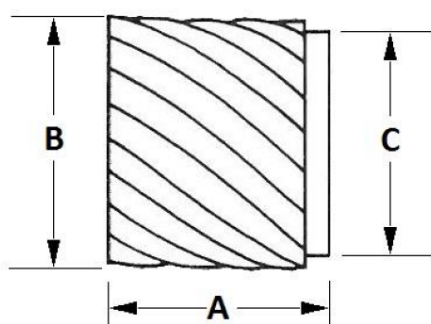

APPLICATION

IPHI adds a hardened steel thread to lightweight castings made from aluminium or Zamak. Its spiral knurling also ensures that it can be easily inserted into the material with minimum force thereby allowing it to be used in thin wall boss.

IPHI SERIES

Specifications				
Thread	A	B	C	Rec. Hole Diameter
M2	5,6	3,9	3,6	3,70
M2,5	4,5	5,3	4,8	4,85
M3	4,5	5,3	4,8	4,85
M3,5	5,6	6,2	5,5	5,60
M4	6,9	7,7	7,1	7,20
M5	6,9	7,7	7,1	7,20
M6	9,5	10,3	9,5	9,60
M8	9,5	12,5	11,9	11,95

IPHI

MATERIALS AND FINISH

- Case hardened steel
- Galvanised
